SUMMARY

Software Engineering graduate with over one year of hands-on experience in AI/ML, specializing in Large Language Models (LLMs), Agentic RAG, chatbots, and deep learning. Skilled in Python, TensorFlow, PyTorch, Hugging Face Transformers, Pandas, and Autoencoders, with practical experience in ANN, CNN, RNN, and Transformer models. Experienced in building scalable AI solutions, fine-tuning models, and developing data-driven applications for real-world problems.

EXPERIENCE

Engineer Intern - Intern

Feb 2026 - June 2026

CARE PVT LTD. – Islamabad (Onsite)

- Worked on BMS data acquisition using ESP & CAN, with preprocessing and Firebase integration for real-time data flow.
- Developed association rules for battery attribute analysis and behavioral insights.
- Trained GANs and Transformer models for anomaly detection, SOH, and RUL prediction.
- Developed a Multi-Agent RAG system for automated reporting and battery data insights.

Junior AI / ML Engineer - Freelancer

December 2025 - June 2026

SoftAura Solutions – Multan (Remote)

- Designed, developed, and deployed AI/ML models and LLM-powered applications.
- Built scalable backend systems and integrated REST APIs for AI-driven solutions.
- Performed model evaluation, hyperparameter tuning, and performance optimization to improve accuracy and efficiency.

Artificial Intelligence - Intern

July 2025 - August 2025

NUTECH Innovation Center – Islamabad (On-site)

- Developed an AI-powered admission chatbot using a RAG pipeline with LangChain and Groq LLMs.
- Engineered and deployed an LLM-based grammar and tense corrector web app.
- Built a social media emotion predictor using Hugging Face Transformers.

Artificial Intelligence - Intern

May 2025 - Sep 2025

NESCOM – Islamabad (Hybrid)

- Explored LLMs and deep learning concepts with hands-on implementation.
- Built a multi-agent Agentic RAG system using LangChain, Streamlit, and Groq's LLaMA3-70B for SQL-based querying.

SKILLS SUMMARY

Programming Languages: Python | C++ | JavaScript (HTML/CSS/JS)

LLMs & GenAI: Groq (LLaMA3-70B/8B) | LangChain | LLM Integration | Generative AI

RAG & Agents: Agentic RAG | Multi-Agent Workflows | SQL Generation & Validation

ML & NLP: Sentence-Transformers | FAISS | OpenCV | ANN | CNN

Frameworks: Streamlit | Pandas | PyMuPDF | TensorFlow | PyTorch

Databases: SQLite | MySQL | MongoDB

EDUCATION

Bachelor of Science in Software Engineering

Nov 2022 - June 2026

Fatima Jinnah Women University, The Mall Road, Rawalpindi

- CGPA: 3.42
 - Relevant Courses: Artificial Intelligence, Artificial Neural Networks, Digital Image Processing, Deep Learning
-

PROJECTS

AI-Driven Sales Insights Chatbot

July 2025 - August 2025

- Built an AI-powered Sales Insights Assistant using Agentic RAG, LangChain, Groq LLaMA3-70B, Python, SQLite, and Streamlit.
- Designed a multi-agent pipeline for SQL generation, validation, and summarization to turn natural queries into accurate insights.
- Automated sales reporting, enabling instant analysis for non-technical managers.
- Boosted reporting efficiency by 70% and improved data accessibility by 80%.
- Delivered a scalable tool that reduces analyst workload and supports faster decision-making.

Multi-Agent Smart Product Assistant

July 2025 - Sep 2025

- Built an Agentic RAG system using Groq LLaMA3-70B, LangChain, SQLite, and Streamlit to enable natural-language-to-SQL querying for non-technical users.
- Automated SQL generation, validation, and summarization, eliminating manual reporting and improving accessibility to structured data.
- Improved query accuracy by 85% and reporting speed by 70%, enabling faster, AI-driven business insights and decision-making.

FJWU Prospectus Q&A Chatbot (RAG-based)

August 2025 - Sep 2025

- Improved information retrieval performance by 60% using optimized vector search, embeddings, and query processing.
 - Developed a semantic search engine with Sentence-Transformers, FAISS, LangChain, and Groq LLaMA3-8B for accurate context-aware document retrieval.
 - Built and deployed a Streamlit chatbot for real-time academic information retrieval, enhancing response speed and accessibility.
-

CERTIFICATIONS

- AI Agents: From Prompts to Multi-Agent Systems (Coursera)
 - Decoding AI: A Deep Dive into AI Models and Predictions (Coursera)
 - Google AI Essentials V1 (Coursera)
 - Introduction to AI (Google)
 - Python Essentials (CISCO Networking Academy)
-

LEADERSHIP & COMMUNITY ENGAGEMENT

- **Cofounder, Youth Empowerment:** Led community initiatives to inspire and mentor young individuals in technology.
- **BETA MLSA , Microsoft :** Represented Microsoft Learn Student Ambassadors, facilitating collaboration and knowledge-sharing among students in the tech community.
- **Volunteer, Dev Jirga:** Contributed to the growth of the developer community by organizing events and supporting knowledge-sharing initiatives.
